⇒ Socket.Io
⇒ Expo
⇒ Xcode

Summary

Web developer with a background in Computer Engineering. I am high skilled in devloping visual pleasing full stack applications. My enthusiasm in my travel experience led me to General Assembly where I was thoroughly immersed in the field. During my time in General Assembly where I was heavily involved I acquired front-end and back-end skills in CSS, React.js, JavaScript, Node.js, and Express. I am looking to bring my experiences to an organization that encourages growth and professional development.

EXPERIENCE

2018

General Assembly | *Engineer Fellow*

- Developed fully CRUD applications using REACT, Express, and Node.js.
- Completed 500+ hours of training which were taught by top developer professionals.
- Focused on common best practices like object-oriented programming, MVC frameworks, data modeling, agile software development, and test-driven applications.
- Collaborated with developers were we created a drink ingredients app. A user can look up cocktails from the cockatilsDB database and see the ingredients of their favorite drinks. Link to repo: github.com/solomonsokoya/DrinkUpRefactored

2016 - Present

Cheesecake Factory | *Server/Bartender*

- Provided friendly and attentive service to guest.
- Displayed ethusiam and knowledge about the restaurant's menu and products.
- Computed all transactions including credit cards, gift cards, and cash.

2011-2016

Eden 2 | *Direct Support Professional*

- Light house keeping & cooking.
- Helped develop ADL skills for participants with autism and various mental disabilties.
